Digital CNC High Performance Pleater with Cantilever Unwinder

- P3, third digital high performance pleater generation, fully automatic digital CNC controlled
- picture shows one of our standard pleater version working width 1000mm, pleat range up to 55mm
- down infeed, exit top and bottom heaters included, with special reinforcement bar
- pneumatic back pressure system, customized exit back pressure platforms
- all heaters with quick lift movement for faster cooling down while holding the pleat packs in place
- delivery time 8 weeks, ready to produce with high production throughput and highest efficiency

Unwinder:

- 2 layer driven sensor controlled unwinder cantilever style for fast media roll change
- expandable shafts for easy load, sensors for material end detection, control ready for 3rd media roll

Any customized or special unwinder design can be realized upon request
